PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Artificial Intelligence with hands-on experience building full-stack AI applications using React, Node.js, PostgreSQL, and LLM APIs. Experienced in developing AI-powered tools, REST APIs, machine-learning pipelines, and production-oriented web applications. Strong foundation in Data Structures, Algorithms, and end-to-end application development.

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University | 2022–2026

Bachelor of Technology in Computer Science & Engineering (Artificial Intelligence)

WORK EXPERIENCE

IBM PBEL Program – Artificial Intelligence *Feb – Mar 2026 | Remote*

- Developed a predictive compensation model using Linear Regression on structured workplace datasets within IBM's Project-Based Experiential Learning initiative.
- Engineered an end-to-end machine learning pipeline — data cleaning, feature engineering, and rigorous model validation — to deliver salary predictions from structured organizational data.

React Native Developer Intern | Saral Tech *Jul 2026 – Present | Remote*

- Resolved production bugs and implemented enhancements across a React Native application, including Vendor Dashboard, User Management, Vendor Detail, Form Validation, and Incentive Structure modules.
- Collaborated in an Agile environment using React Native, Redux, Strapi CMS, REST APIs, Axios, and Git/GitHub for debugging, API integration, code versioning, and end-to-end testing.

PROJECTS

TaskFlow Pro *React.js, TypeScript, Node.js, Express.js, PostgreSQL, Gemini API*

- Architected a dependency-aware Kanban platform utilizing directed acyclic graphs for task modeling, featuring cycle-prevention algorithms, automated state determination, and dynamic timeline recalculations.
- Leveraged the Gemini API to suggest likely task dependencies, with explicit user confirmation and the same DAG validation used for manual dependency creation.
- GitHub:* <https://github.com/aniket-dev30/TaskFlow-Pro>

PromptOps AI *React.js, TypeScript, Node.js, Express.js, PostgreSQL, Gemini API, Transformers.js*

- Built a full-stack "Git for AI prompts" platform with Git-style version control, semantic diffing, and side-by-side execution comparison across prompt versions.
- Developed an AI evaluation engine using the Gemini API to score prompts, and integrated a RAG-based suggestion system (Transformers.js) that grounds improvement suggestions in user history.
- Designed a scalable PostgreSQL schema and deployed the application across Render and Netlify.
- Live:* <https://prompt-version-control.netlify.app/>

CodeFix AI *React.js, Node.js, Express.js, Gemini API*

- Built an AI-powered debugger that detects code errors, generates fixes, and provides explanations using the Gemini API.
- Developed a full-stack web application with a Monaco-based editor integrating LLM-based analysis for real-time code review, instant error detection, and structured fix/explanation pairs.
- Live:* <https://codefix-ai.netlify.app/>

TECHNICAL SKILLS

AI/ML: NLP, NLTK, Scikit-learn, Linear Regression & Predictive Modeling, LLM APIs, Retrieval-Augmented Generation (RAG), n8n, NumPy

Languages: Python, JavaScript, TypeScript, Java, SQL

Frontend: React.js, React Native, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, PostgreSQL

Tools: Git, GitHub, Postman, VS Code, Vercel, Render

CERTIFICATIONS

- Supervised Machine Learning: Regression and Classification – DeepLearning.AI
- NPTEL (IIT Kharagpur) – Algorithmic Graph Theory and Data Structures
- React Basics, Advanced React – Meta
- Oracle Fusion Cloud Applications HCM Process Essentials Certified; Oracle Cloud Success Navigator Essentials
